

Member-Owned Residential Solar Options Agreement

Coastal Electric Cooperative members have 3 options for Parallel Interconnection for solar panels they own and maintain. In order to parallel your solar system with Coastal Electric Cooperative's system, you will need to choose which option would best fit you needs.

Option 1 – Standard Solar Metering

- Facility charge - \$19.00
- Energy rate for all metered energy – residential retail rate
- No energy credits or saved (banked) excess solar energy

Option 2 – Net Solar Metering

- Facility charge - \$49.00
- Energy rate for all metered energy – residential retail rate minus 2¢
- Excess energy produced by your solar panels can be saved (banked) and applied as a credit to future power bills
- Energy credits are zeroed out each year in the fall

Option 3 – Aggregate Net Solar Metering

- Facility charge - \$59.00 primary meter only -- \$19 on other aggregate meters
- Energy rate for all metered energy – residential retail rate minus 2¢ on primary meter
- Other aggregate meters at standard rate
- Excess energy produced by your solar panels can be saved (banked) and applied as a credit to future power bills
- Energy credits are zeroed out each year in the fall
- Solar energy may be applied to 1 or more member accounts regardless of where solar panels are located.
